IntelliGO Networks is a mid-market focused company that can service Global clients using Gartner recognized MDR Tools as well as IBM QRadar (SIEM). IntelliGO's MDR service equips your organization with enterprise-grade security, for the price of a single security analyst.

Their single-minded purpose is to crush, thwart, and dominate the threats within your environment. They are cybersecurity experts, and their proprietary platform enables them to offer a service that is comprehensive, quick to implement, and doesn't require you to invest in more security assets or personnel.

Rather than defending the perimeter, they focus on the detection of, and response to, threats within your environment. Their threat hunters leverage our proprietary platform to gain visibility into every aspect of your network, data centre, and endpoints.
